What are the effects of Green Blue Space (GBS) exposure on maternal and infant health?

Research plan:

Aims:

Identify the impacts of GBS access and exposure on maternal and infant health.

Objectives:

Create longitudinal environmental, health and demographic individual-level data linkages.

Use datasets to answer research questions.

Study design:

Retrospective longitudinal study.

Study population:

Wales, and Merseyside.

Data source:

Maternity Indicator Dataset SAIL & CIPHA databank.

Study importance:

Measures differential effects of GBS on health outcomes, by deprivation.

Timely and in-line with government environmental policies.
